

The University Jean Moulin Lyon 3, France is recruiting

A fully -funded PhD student in management science

Research laboratory: Magellan Research Lab

Hosting structure: IAE Lyon, University Jean Moulin Lyon 3

PhD supervisor: **Marie-Christine Chalus-Sauvannet**, Professor of Management Sciences (Strategy and Entrepreneurship). Possible co-supervision.

Duration: October 2023/October 2026

Contact: mc.chalus-sauvannet@univ-lyon3.fr

Context of the thesis

The thesis is part of the IEIS project ("International Entrepreneurship and Innovation for Society"), winner of the ANR / SFRI - Graduate School call for projects.

The overall project of Graduate + aims to strengthen the links between teaching and research and develops a path of excellence and offers doctoral scholarships.

Objective of the thesis

Thesis projects should focus on the theme of entrepreneurship and more specifically on the development of innovative and international projects with societal "impacts" (climate, health, gender, inclusion, greencity, smartcity, ...)

Benefits

Graduate + IEIS students will benefit from academic and socio-economic mentors but also from a synergy with incubated students or other students interested in the theme around events, meetings and exchanges, including internationally. Meetings with guest researchers working on their theme, participation in conferences and summer schools on their theme will be organized.

Recruitment requirements

Candidates must have a Master's degree in management science (or another section but with a solid foundation in entrepreneurship) and have completed a research paper.

Application

The intentions of application must be sent in the form of a CV and a 4-page research project to the following email address: mc.chalus-sauvannet@univ-lyon3.fr

The complete file including the thesis must be sent to the doctoral school by June 29, 2023 at the latest.
